SELF-DIRECTED LEARNING

Self-directed learning (SDL) refers to when an individual identifies their learning needs and sets their own educational objectives.

DEFINITION

"In its broadest meaning, SDL describes a process in which individuals take the initiative, with or without the help of others, in diagnosing their learning needs, formulating learning goals, identifying resources for learning, choosing and implementing appropriate learning strategies, and evaluating learning outcomes" (Knowles, 1975, p. 18).

EXAMPLES

Child exploration

A toddler enters an unfamiliar room and immediately begins exploring the surroundings and learning about them.

Reading self-help books

Mika enjoys reading self-help books about how to become inspired and motivated to reach your fullest potential.
